

PRESS RELEASE
30.06.2022

MAGROUP Magnaghi Aeronautica Group is partnering with Lilium on the development of landing gears for the Lilium Jet.

MAGROUP Magnaghi Aeronautica Group and Lilium N.V. (NASDAQ: LILM) ("Lilium") have signed a contract for the development, manufacturing and qualification of nose and main landing gears structures for the Lilium Jet.

This agreement marks a significant evolution in MAGROUP's global landing gear solutions within the regional electric air mobility market.

MAGROUP, a leading manufacturer of landing gears and actuation components, will tailor the landing gear system for the Lilium Jet's unique design and will contribute to achieving the take-off and landing comfort performances of the emission-free aircraft

"We are very honoured and proud to count Lilium among our customers. We share Lilium's vision of the huge potential of the Urban Air Mobility segment, which will bring a new age of commercial transport. Our effort consists in continuously offering our capabilities, investments, heritage and expertise, and constantly developing our skills by anticipating market demands and needs and by working closely with our customers in order to integrate our solutions into their programs," declared Giorgio Iannotti, MA Group SVP Business and Product Development.

Pietro Persico, Engineering, Research and Test Director, said "We provide technologies, products and services needed for tomorrow's aerospace markets by developing innovative solutions. A significant number of our engineers are committed to Research & Development, exploring new paths towards innovation day after day."

MAGROUP Magnaghi Aeronautica Group:

- **Magnaghi Aeronautica** is the operating parent company of leading companies in the aerospace industrial segment. Magnaghi Aeronautica designs, manufactures hydraulic and electro-mechanical landing and actuation systems for fixed and rotary wing aircraft, civil aviation and defense.
- **Salver**, specialized in the development and production of aerospace structures made of advanced high performance composite materials.
- **Metal Sud**, a company specialized in surface treatments and special processes for the protection of aeronautical components.
- **Magnaghi do Brazil**, specialized in the production of assemblies and aeronautical components.
- **Blair-HSM**, specialized in the production of landing systems and complex aerospace components.
- **Air Marine and Airlift Hydraulics**, supplier of landing gear maintenance, repair and overhaul (MRO) services for aircraft primes and integrators. Also provide plating services and surface treatments for the aerospace industry.
