

Press Review
Paris Air Show 2023

June 29, 2023

Article from Il Mattino about the Paris Air Show

Aerospace, the Campania region lands at Le Bourget in Paris

Daily newspaper *Il Mattino* published an article about the Paris Air Show 2023 edition and the presence of the Italian industry.

Quoting from the article, “There are also bigger company at the show, as **Paolo Graziano’s MAGROUP**, which has recently announced a one of a kind experimenting lab in the Napoli Est site for the production of new landing gears”.

These articles report about the industrial partnership between **MAGROUP - Magnaghi Aeronautica** and **Roboze**. Roboze and Magnaghi are working together with the goal to enter soon in the production of the **class 3 and 2 landing gears components**, standardising at the same time the manufacturing approach and qualification of 3D printing technology.

*"We are extremely excited about the partnership with Roboze" said **Paolo Graziano**, CEO of **MAGROUP**. "Magnaghi brings its historical knowledge and expertise in the aerospace industry, combined with its constant search for innovative technological opportunities to offer our customers around the world. With Roboze's expertise in **3D printing technology** and materials science, we believe that together we will accelerate the adoption of **additive manufacturing** in the aviation industry."*
